

WARMIES® Wipes Recipes

This recipe is for gentle cleansing and perfect for daily use.

All-Purpose Wipes

2 tablespoons Baby Wash (all-natural works best)

2 tablespoons Olive Oil

2 cups Water

Using a container or spray bottle with a tight lid, mix all ingredients, cover and shake to blend. If using spray bottle, spritz on each wipe prior to use. Or you can pour solution over wipes if using a wipes box using just enough to MOISTEN.

This recipe is soothing for mild skin irritations.

Aloe Vera Wipes

1/4 cup Aloe Vera Gel

2 drops Tea Tree Oil

2 cups Hot Water

Using a container or spray bottle with a tight lid, mix all ingredients, cover and shake to blend. Let mixture cool before use. You can spritz on each wipe prior to every use or pour solution over wipes inside wipes box to prepare several at a time.

This recipe is great for moisturizing dry skin.

Essential Oils Wipes

2 drops Tea Tree Oil

2 drops Lavender Oil

(Please be sure to use only pure essential oils – **do NOT** use synthetic oils.)

2 drops Chamomile Oil

2 cups Water

1 vitamin E Cap

Using a container or spray bottle with a tight lid, mix all ingredients, cover and shake to blend. Cut open vitamin E caplet and squeeze into the water, and add essential oil drops. Mix well in a spray bottle or your wipes box. Spritz on wipe before using if in spray bottle. Swish solution around over wipes if using a wipes box.

This recipe works best for yeast diaper rashes. The vinegar and essential oils discourage yeast growth.

Soothing Baby Wipes

1/2 cup Distilled Water

1 teaspoon Vinegar

1/4 cup Aloe Vera Gel

1 tablespoon Calendula Oil

1 drop Lavender Essential Oil

1 drop Tea tree Essential Oil

Using a container or spray bottle with a tight lid, mix all ingredients, cover and shake to blend. Place wipes in a container and pour solution over them, moistening wipes. Store any extra solution in refrigerator.

NOTE: Using distilled water will keep fresh for a long time especially if you used distilled water.

CAUTION: If a baby had a really red, raw diaper rash you might not want to use these wipes as vinegar may cause a burning sensation.

CAUTION: do not use any of these recipes if Baby is known to be sensitive to any of these ingredients. If irritation occurs, please discontinue use and consult your doctor. Keep out of reach of children.
